

Calling all California educators!

Educational Testing Service (ETS) invites California educators to participate in the hand scoring of California's Smarter Balanced operational tests in spring 2015. Participants will score student responses including short written responses, essays, and performance tasks.

Handscoring is an excellent opportunity for educators to become more familiar with this new generation of student assessments.

Hand scorers will be compensated. A link to the application form is on the California Assessment of Student Performance and Progress (CAASPP) Web site.
